

PARTICIPANTS NEEDED FOR RESEARCH ON ORAL HEALTH AND DAILY LIFE

Online Anonymous Survey Study | 10-15 minutes

Are you interested in helping with a research study to understand what 'typical' oral health survey scores look like for adults in Ontario?

We are looking for people:

- 18+ years of age and living in Ontario
- Not currently dealing with an urgent dental problem (e.g., severe tooth pain, swelling of the gums/face, pus/drainage, fever related to a tooth, or being told you have an infection)
- Have not had major dental treatment in the past 4 weeks (e.g., tooth extraction, a root canal, gum surgery, dental implants)

What is involved:

- This is a **one-time online anonymous 10-15 min survey**
- You will answer a few screening questions, some background questions, and a short oral health questionnaire (OHIP-14)

SCAN TO PARTICIPATE:
