

Primary Care Practice Management (Prac-Man): Mapping approaches and best practices

Survey on the Administration and Management of Primary Care Clinics and Centres

Invitation to complete an online survey

- Our CIHR-funded research team, led by Dr. Agnes Grudniewicz at the University of Ottawa, has developed an online survey to document how primary care clinics are managed.
- The survey explores high-level aspects of clinic administration and management (e.g., staffing, financial management) as well as gaps in resources and policy support.
- *Who is eligible?* Primary care clinic or centre leaders, staff members, or clinicians who hold responsibility for all or most of a clinic/centre's administration and management activities. Clinics must be in British Columbia, Ontario, or Nova Scotia. All primary care clinic/centre types are welcome!
- **If you would like to complete the survey, it may be accessed by scanning the QR code, or at the following link: <https://www.surveymonkey.ca/r/6HG6JJW>**
- Participants can choose to be entered in a random draw for a 256 GB iPad.
- If you have any questions, please contact our research associate, Ellen Randall, at erandall@uottawa.ca

Note: This study is being conducted independently of any organization circulating this notice on the study's behalf.
