

CPRI Research Symposium 2026

Optimizing Treatments and Environments for Complex Child and Youth Mental Health and Development

JUNE 16, 2026 | HYBRID MEETING

REGISTRATION IS NOW OPEN

You're invited to the biennial CPRI Research Symposium! This hybrid event —offered both virtually via Zoom *and* in-person at CPRI in London, Ontario —is designed for researchers, clinicians, academics, medical and allied health professionals, educators, and learners. Explore the following themes:

- Tailoring Dose, Duration, and Frequency for Therapeutic Interventions
- Designing Healthy and Supportive Spaces in a Technological Age

For RCPSC (MOC Section 1):

This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada, and approved by Continuing Professional Development, Schulich School of Medicine & Dentistry, Western University. You may claim a maximum of 4.00 hours (credits are automatically calculated). Each participant should claim only those hours of credit that they actually spent participating in the educational program.

Reserve your spot today!

TICKET PRICES

Caregivers and Student Learners:

All Day **Virtual** Pass - \$40 CAD
All Day **In-Person** Pass - \$60 CAD*

Researchers, Clinicians, and Professionals:

All Day **Virtual** Pass - \$80 CAD
All Day **In-Person** Pass - \$120 CAD*

* Includes in-person networking opportunities, research posters engagement, continental breakfast, Piping Kettle lunch, and SWAG!

WITH INVITED PLENARY LECTURES FROM:

Karleigh Darnay

Dr. Celia Robichaud

Video-recorded speaker content will be viewable for 90-days post event!

SYMPOSIUM LEARNING OBJECTIVES:

- Describe evidence-based strategies for adjusting treatment dose, duration, and frequency over time, including the processes of de-prescribing medications and implementing harm reduction approaches.
- Evaluate methods for enhancing treatment precision and support systems by interpreting findings from case studies, tele-mental health practices, primary care provider interventions, and Trauma-Informed Care (TIC) models.
- Explain the impact of supportive environments, nature access, sensory-motor functioning, and holistic Indigenous health practices on child and youth mental health and development through evidence-based inquiry.
- Determine the health benefits associated with leisure and play, support strategies for balancing screen time, and interpret the effectiveness of technology-enhanced writing tools.
