

# Learning Health System Supports for Alliance Members

The Learning Health System team at the Alliance supports members to learn from practice-based and client data in real time to improve care delivery and decision making, while also supporting evidence-based advocacy for changes to the health system.

We need support with **quality improvement**

- Implementing or improving a social prescribing referral pathway
- Training on using common quality improvement methodologies and tools
- Optimizing workflow by reducing waste and increasing efficiency
- Implementing new tools and processes into your practice

Ask our **Quality Improvement and Performance Leads**

We need support with **research, evaluation and/or policy**

- Evaluating programs and services
- Planning and implementing research projects (e.g., identifying and addressing health inequities, community-based research methods, etc.)
- Leveraging research and evaluation data to inform program design and delivery

Ask our **Research and Policy Analyst**

We need support with **knowledge translation**

- Connecting with:
  - Communities of practice
  - Documents and resources
  - Peers and experts
- Sharing:
  - Research opportunities
  - Learning events and trainings
  - Tools and resources
  - Success stories and learnings

Ask our **Knowledge Translation Specialist**

We need support with the **EMR**

- Developing and implementing PS Suite workflows
- Collecting accurate practice-based data
- Generating reports
- Analyzing and comparing data
- Advocating for our needs with vendors

Ask our **Provincial Data Management Coordinator**
