

SHARE YOUR EXPERIENCE WITH VIRTUAL HEALTH CARE

If you have had at least one real-time, virtual health care appointment (i.e., video, phone) during COVID-19, we want to hear from you!

Our study, *Learning from Patient's Experiences with Synchronous Virtual Primary Care Encounters During the COVID-19 Pandemic*, is looking to survey individuals from Ontario who have had virtual care appointments with a primary care provider or another healthcare professional in that family practice (family doctor, general practitioner, or nurse practitioner).

As a survey participant, you will:

- Complete a 15 to 20 min. anonymous, online survey
- Help inform recommendations to the Ontario government regarding how to provide high quality health care through the use of virtual care appointments.
- Have the opportunity to enter into a draw for one of five \$100 gift cards of your choice.
