

Our Goal

Harrow Health Centre aims to provide the best care possible to **MEET** patients' health care needs.

What is Demographic Data?

Data collected about characteristics of a population e.g. gender, age, and income for example.

Using demographic data we can reduce health inequities based on language, disability, and other factors.

Health Quality Ontario states that "health equity allows people to reach their full health potential and receive high quality care that is fair and appropriate to them and their needs, no matter where they live, what they have or who they are."

Collecting Patient Demographic Information

Understanding Information Collection

Why is the HHC collecting patient demographic data?

This information will provide us with a bigger picture of WHO we serve. This information will also allow us to plan for services, and provide even better care. Overall, ensuring our patients have access to the highest quality of care.

How is this Relevant to patient care?

The Ontario Human Rights Commission strongly encourages organizations to collect and use demographic information to keep track of outcomes and promote equity.

Asking everyone who comes through our doors these questions will encourage patient centered services. We will learn about patients' diverse needs, and tailor care accordingly.
