

Recruitment

Migrants, 18 years and older, arrived in Canada since 2016 and using community, social and health services.

**Virtual discussion groups of 4 to 8 people
By Zoom – Duration 1,5 to 2 hours**

Confidentiality of responses: discussions recorded but your name will not appear on any document

We want to better understand:

- **how community-based organizations and health and social services have been able to meet your needs since the beginning of the COVID-19 pandemic**
- **how you have experienced these innovations or adaptations to services offered**

This will allow us to integrate the best actions (initiatives) that promote collaboration between different organizations and improve the living conditions of newcomers.

To participate :

- Be an adult (18 years-old and above)
- Have arrived in Canada **on or after January 2016** with the status of refugee, asylum seeker, or without status/insurance.
- Have been using or have used the services offered during the pandemic for migrants of a community-based organization or a public institution located in one of the following areas:
 - Toronto
 - Sherbrooke
 - Montréal (Montréal-Nord, Saint-Laurent, Bordeaux-Cartierville, Côte-des-Neiges, Parc-Extension, and Verdun)
