

## Alliance EQ-5D Pilot Project

---

### What is the EQ-5D project?

- Pilot the EQ-5D tool to support collaborative care planning
- Can be used to
  - Screen for health issues/symptoms and help support creation of coordinated care plans
  - Monitor changes in health outcomes
  - Evaluate specific programs or service delivery using a standardized and validated measurement tool
- Understand the processes involved in the implementation of the EQ-5D for widespread adoption across the sector

### Benefits of the EQ-5D:

- It is easy, simple, and takes 5-10 minutes to complete and is easily integrated into EMR
- Can help clients have a voice in their care
- Can help identify health concerns that may have gone unnoticed
- Can help monitor changes in symptoms and health concerns
- Can help improve program and service delivery

### What's involved?

- Pilot the EQ-5D tool with 20-25 clients within your centre
- Regular connects with project coordinator/lead
- Participation in the evaluation through surveys and interviews

### Schedule for pilot project (subject to change):

- Centre training July/August 2022
- Data collection to start August or September 2022
- Mid-term progress report January 2023
- Evaluation/post-implementation survey/interviews March 2023
- Final report/recommendations May 2023

### Time commitment:

- Participate in training sessions in July/August 2022
- Commit to regular check-in for updates and support throughout pilot
- Participate in evaluation to support recommendations for widespread adoption across the sector

### How do I join?
