

HELP SHAPE VIRTUAL HEALTH CARE IN ONTARIO

Share your experiences as a patient or caregiver with telephone and/or video appointments in primary care!

Our study, *An In-Depth Examination of Primary Care Patients' Experiences with Virtual Care*, invites Ontario residents to complete a survey to share your experiences and suggestions on how to improve virtual care in primary care settings.

As a survey participant, you will:

- Complete a 15 to 20 min. anonymous, online survey
- Help inform recommendations to the Ontario government regarding how to provide high quality health care through virtual care appointments
- Receive a \$5 gift card for your time and effort
