

ECHO Concussion at UHN

Wednesdays • 4:30-5:45 pm

Educate • Engage • Empower

Diagnose & manage your concussion patients through
interactive online medical education.

Each Session includes

A didactic lecture by a content expert & real patient cases (anonymized) presented by participants.

Program learning objectives:

- **Diagnosis:** Improve assessment and diagnosis rates for concussion in primary care, including diagnosis of acute and prolonged concussion symptoms in all age groups.
- **Risk Reduction:** Increase frontline clinicians' expertise and competence in identifying and reducing risk for prolonged symptoms of concussion(s).
- **Management:** Standardize and upgrade concussion management in primary care using evidenced-informed best practice guidelines developed by an international team of leading concussion experts.
- **Overall:** Improve patient health outcomes by reducing protracted recovery and improving support for return to activity

Open to all health care providers

No cost to participate

Access to an inter-professional specialist (hub) team

Earn CPD Credits

Present your real cases for support from the ECHO community
